**EN 15804:2012 +A2:2019,**

**ISO 14025 and**

**ISO 21930**

**Standards**

**For construction products**

**Sub Product Category Rules (PCR) based on Life Cycle Analysis**

**Interior Floorcoverings sub-PCR 2022 FC V1**

## I. Application

While CEN Standard EN 15804:2012+A2:2019 Sustainability of construction works: Environmental product declarations: Core rules for the product category of construction products serves as core Product Category Rules (PCR)s pertaining to all product categories, this document contains sub-PCRs for a particular product category. The former is called the PCR master document and the latter is called the sub-PCR. When new product assessments are needed, a sub-PCR is developed and new rules defined for that category. As environmental health legislation is enacted, rules in the master document shall be revised with file name and revisions clearly marked so all such PCRs are identifiable for those points in time.

## II. Authors

This sub-PCR, compiled by Delwyn Jones, Director Sustainability, The Evah Institute a Division of Ecquate Pty Ltd has been customised for this product class only. Rules were approved for Global GreenTag adoption by David Baggs, Program Director, Global GreenTag International Pty Ltd.

## III. Terms of Validity

- Floorcoverings sub-PCR 2022 FC V1 PCR issued 20/03/2022 valid to 20/03/2027

## IV. Goal

The intended goal of this sub-PCR is a guide for developing EPDs for sets of defined products with specified functionality. Users include specifiers, manufacturers and stakeholders. It is valid for all such defined products and related components according to standards and technical approvals herein.

## V. Product Set Definition

The declared product set includes floorcovering used for buildings of all kinds including fabrications of: resilient, dry or wet areas, moisture resistant, carpet, felting, underlay or backing made from: woven, non-woven, homogenous, heterogeneous, melded, laminated, cast or extruded forms of: metal, wood, pulp, paper, polymer, vinyl, rubber, plaster, wool, hair, fibre, fabric or composites

Where relevant, specifications must conform to International and Australian Standards or other equivalent recognised standards including:

- Australian and New Zealand Standard AS/NZS 2111.1:1996 Textile Floor Coverings – Test and Measurements – Machine-made Textile Floor Coverings – Determination of Total Thickness and or;
- AS 1884 Floor coverings – Resilient sheet and tiles.
- ASTM F970 Standard Test Method for Static Load Limit and EN 425/ISO 4918 Chair Castors test.
- AS ISO 9239 Reaction to fire tests for flooring; BCA Spec C1.10 Reaction to Fire and BCA section C1.10a Fire Hazard Properties – Floors, Walls and Ceilings;
- AS/NZS 1860.1:2002 Particleboard Flooring-Specifications; EN ISO 10582:2012 Resilient Floorcoverings Heterogeneous Vinyl Floorcoverings Specification; EN ISO 105874: 2012 Resilient, Laminate and Textile Floorcoverings Classification;
- AS 4586 Slip resistance classification of new pedestrian surface materials
- EN 13893 Resilient, laminate and textile floor coverings; EN 660-2 Determination of wear resistance; EN ISO 10581 Resilient floor coverings specifications
- International Standards Association Standard ISO/TC 219 – Floor Coverings; ISO 14486:2012 Laminate Floor Covering – Specification

System outcomes and results are declared per unit mass and reflect product performance at reference conditions of exposure, strength, wear, temperature and humidity defined by 14025:2006, 6.7.

## VI. Declared Unit

The declared unit is a kilogram of a given mass of interior floorcovering per square metre covered in any building sectors cradle to gate.

## VII. Functional Unit

The functional unit is 20 years use of a given area of floorcovering per kilogram cradle to grave
