

Research Intern

Positions Available for 2010/2011

Be part of our team! Sustainable Product Research Assistants needed

Sustainable product research assistants are needed for Australia's leading data and knowledge base of sustainable building materials and technologies.

As part of your internship/work experience period, you will learn and understand the processes involved in conducting life cycle analyses of products relevant to the building and construction industry, as well as additional knowledge on international Green Building Rating Tools such as Green Star™, LEED®, NABERS and BASIX amongst others. Furthermore, you will gain a better grasp on the environmental health impacts of products used in everyday life.

You will work directly with our current research team headed by Technical Director, David Baggs, an award winning chartered architect, eco-product and energy efficiency consultant.

Internship and or Work Experience Positions ONLY**

This experience will give the selected students an understanding of:

- the issues involved in sustainable materials
- the range of health and eco preferred products
- mandatory and voluntary building sustainability rating systems.
- the principles and practice of life cycle based product assessment
- knowledge of eco-labelling systems

For more information, visit www.ecospecifier.org or phone 1300 669 997

***This is an unpaid position suitable for students in the field or anyone who has a valid interest in the building and construction industry.*
